A NOTE FROM THE FOUNDER

Why I Built ITQAN

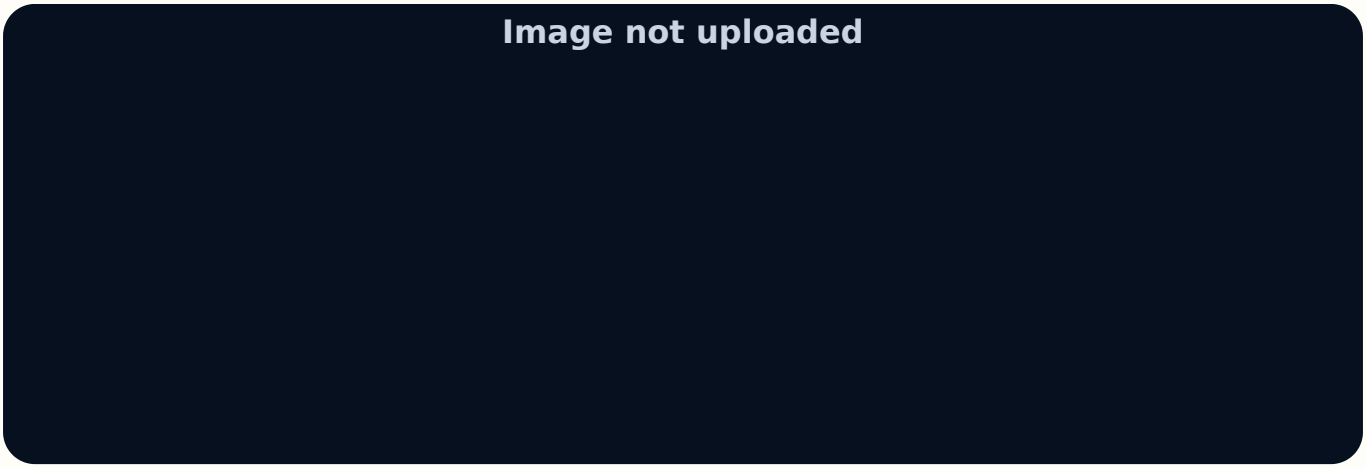

I saw many solutions being offered before the real problem was understood. ITQAN was created to listen first, bring clarity, and support proper execution.

WHAT I BELIEVE

Clarity Comes First

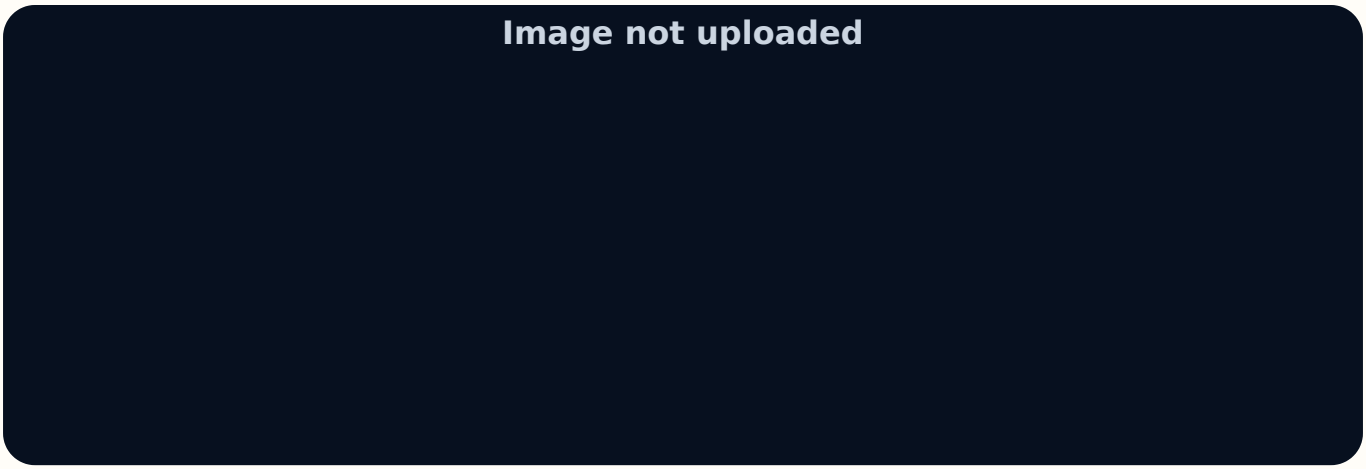

Many business problems grow because the work or responsibility is unclear. We make the situation clear before suggesting what should change.

OUR APPROACH

We Start With the Work

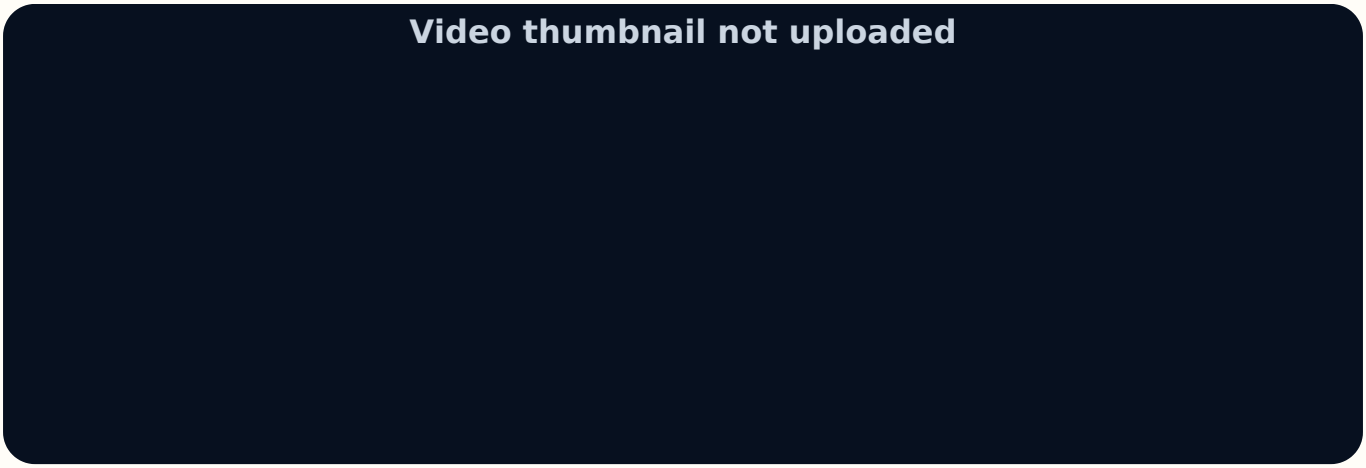

We begin by understanding how the business actually works. Tools and technology come only after the real need is clear.

HONEST ADVICE

Not Every Problem Needs Software

Sometimes the right answer is a better process, clearer reporting, or stronger responsibility. We recommend what the business needs, not what is easiest to sell.

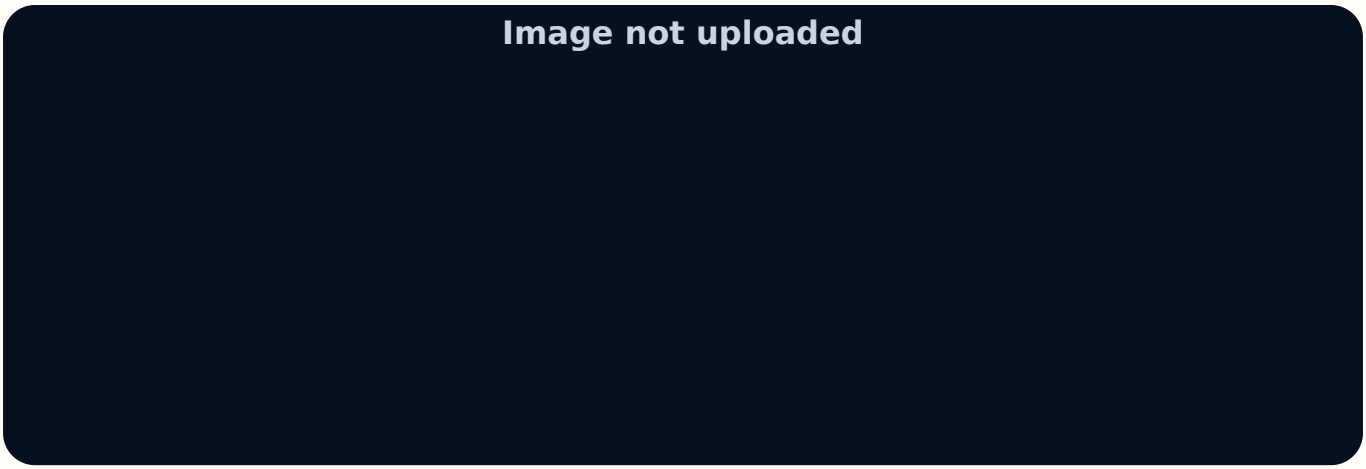

4

HOW WE CONSULT

Listen Before Advising

Good advice cannot be built on assumptions. We listen carefully before suggesting any direction.

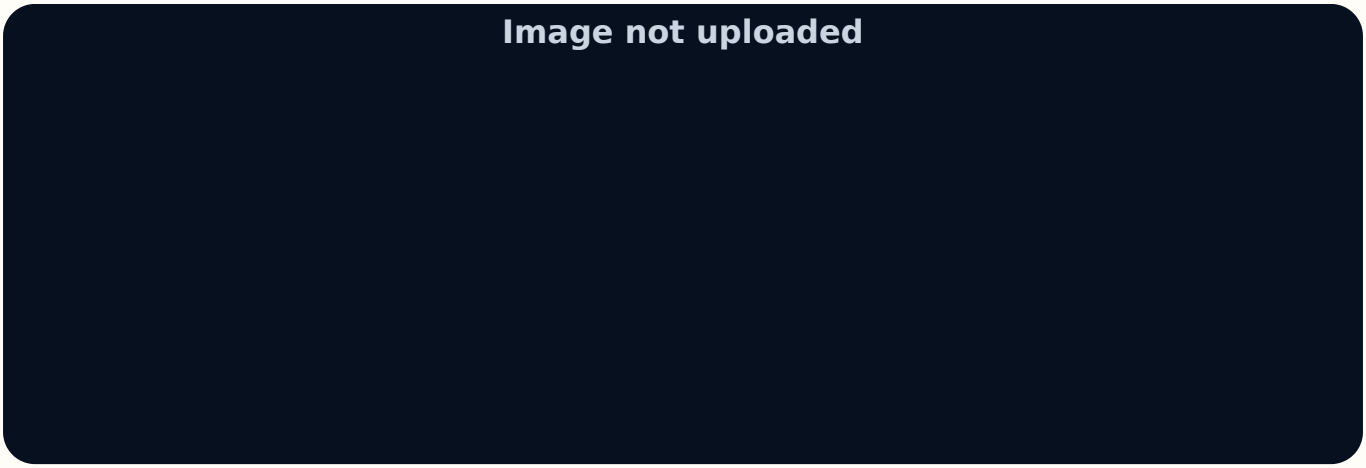

5

OUR RESPONSIBILITY

Advice Must Be Practical

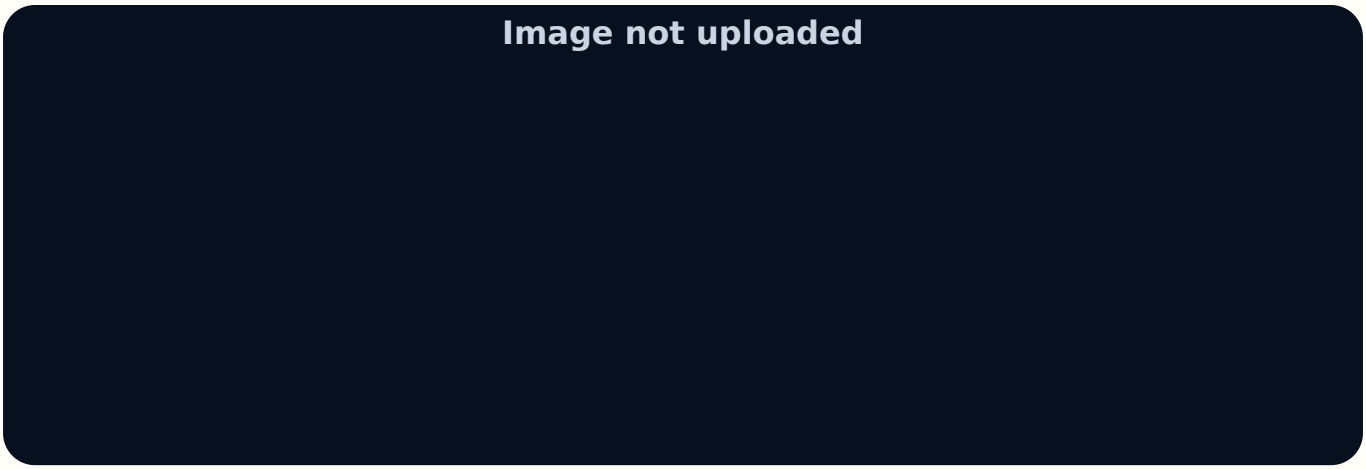

A recommendation is useful only when the business can apply it. We consider the people, budget, time, and real working conditions.

ABOUT EXECUTION

A Plan Is Only the Beginning

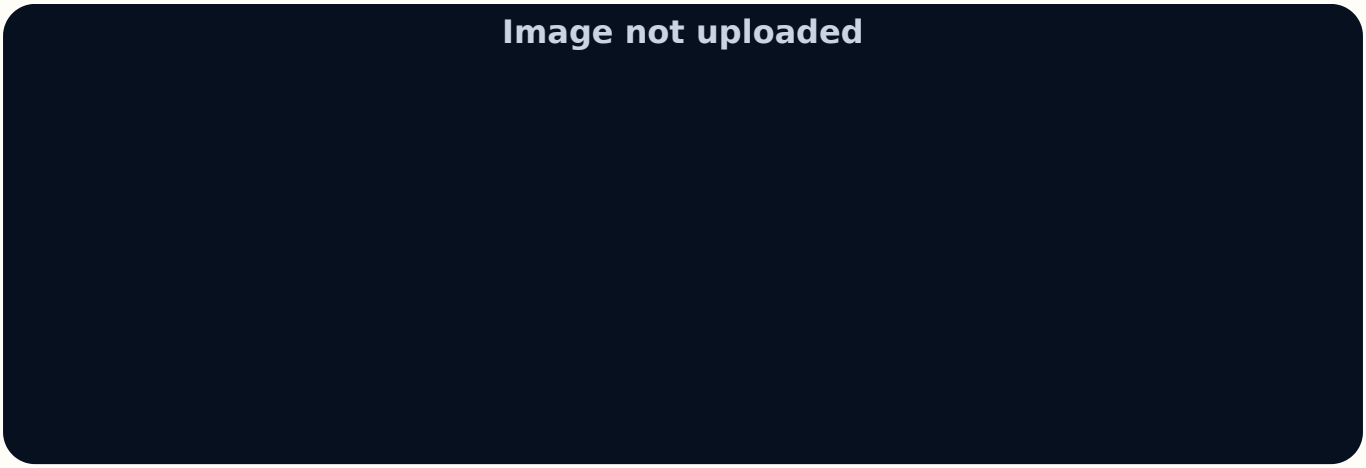

A good plan has little value without proper execution. We stay involved to help the work move forward.

HOW WE DEFINE QUALITY

Quality Is More Than Appearance

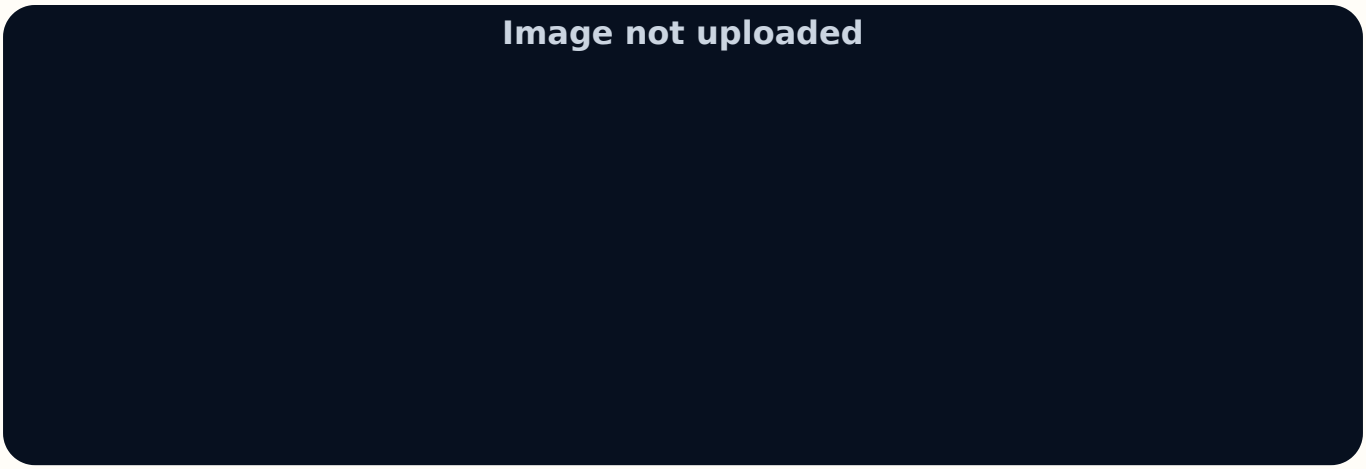

A system can look good and still make work difficult. Quality means it is useful, reliable, and easy to manage.

HOW WE DEFINE QUALITY

Quality Is More Than Appearance

A system can look good and still make work difficult. Quality means it is useful, reliable, and easy to manage.

OUR VIEW OF TECHNOLOGY

Technology Should Fit the Business

Technology should support the business, not control it. We choose or build systems around the actual need.

WORKING WITH PEOPLE

People Make Systems Work

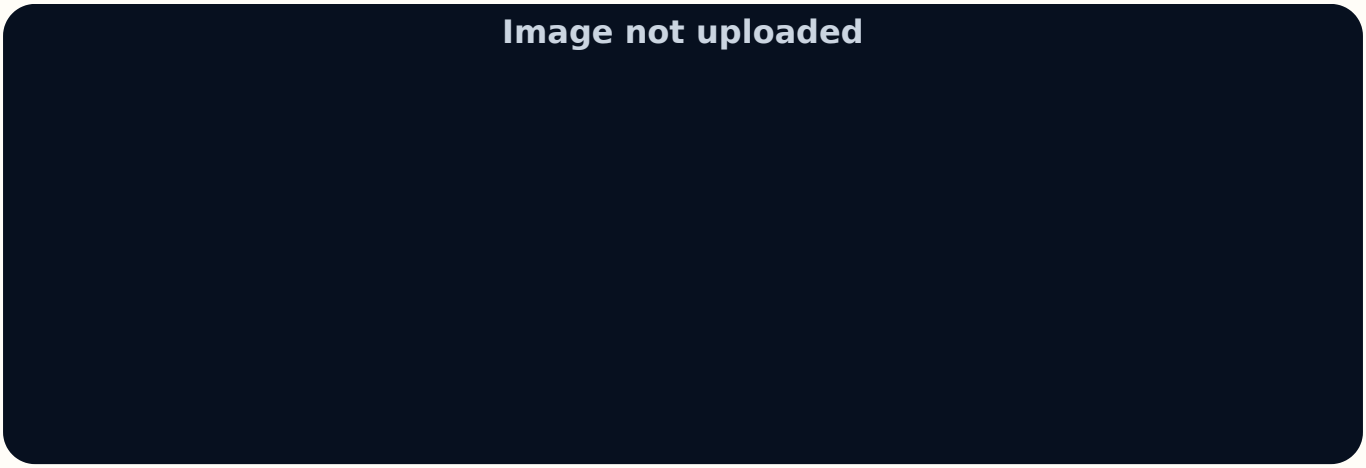

No process or software succeeds without the people who use it. We design with their needs, habits, and abilities in mind.

SIMPLICITY

Keep What Is Necessary

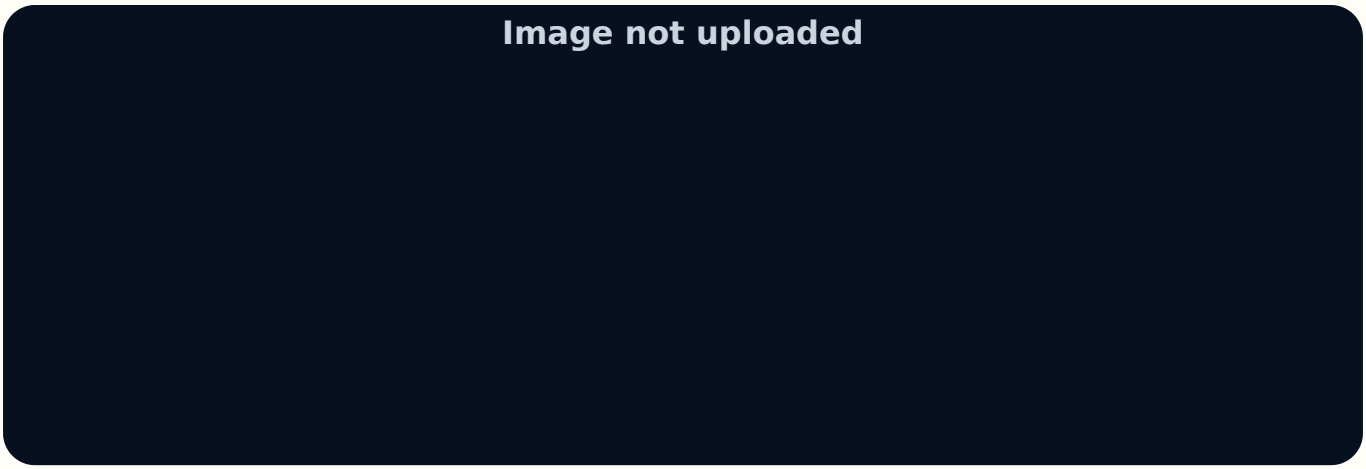

More features do not always create more value. We prefer clear workflows and fewer unnecessary steps.

TRUST

Say What Is True

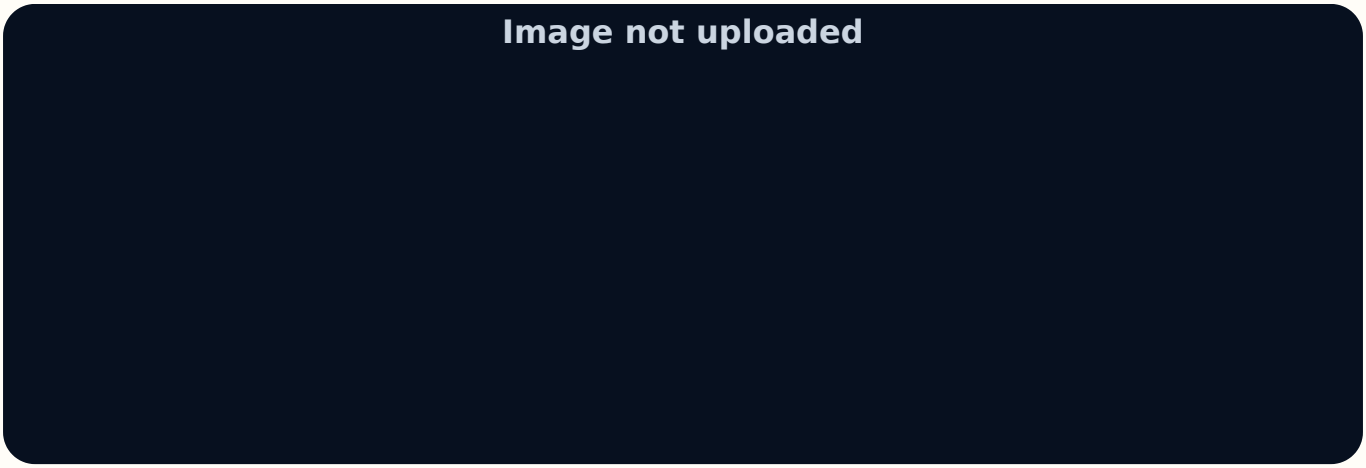

We speak honestly about risks, limitations, cost, and responsibility. Clear communication builds lasting trust.

TRUST

Say What Is True

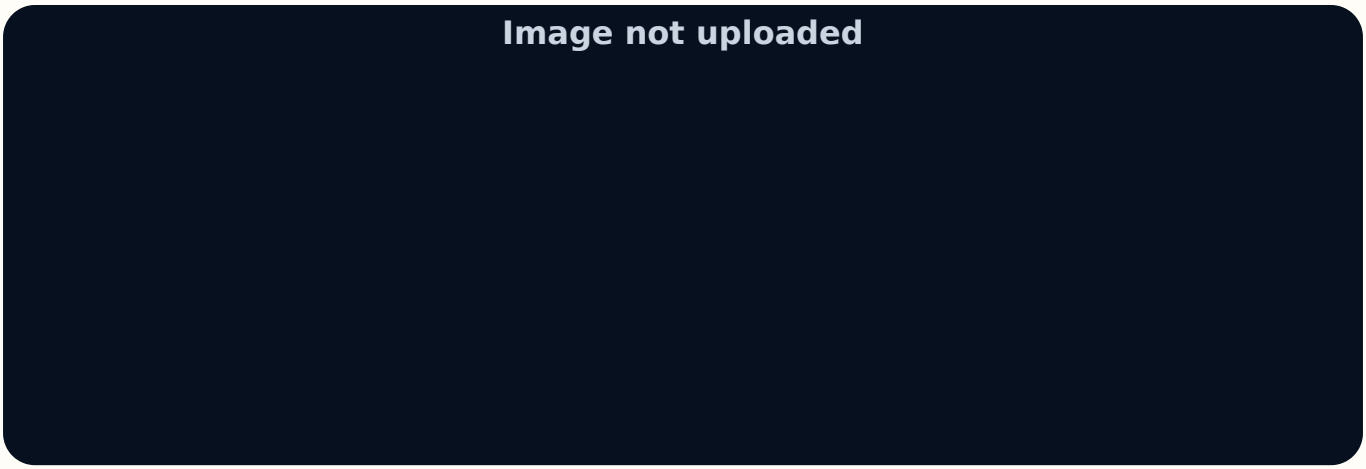

We speak honestly about risks, limitations, cost, and responsibility. Clear communication builds lasting trust.

BUSINESS UNDERSTANDING

The Context Matters

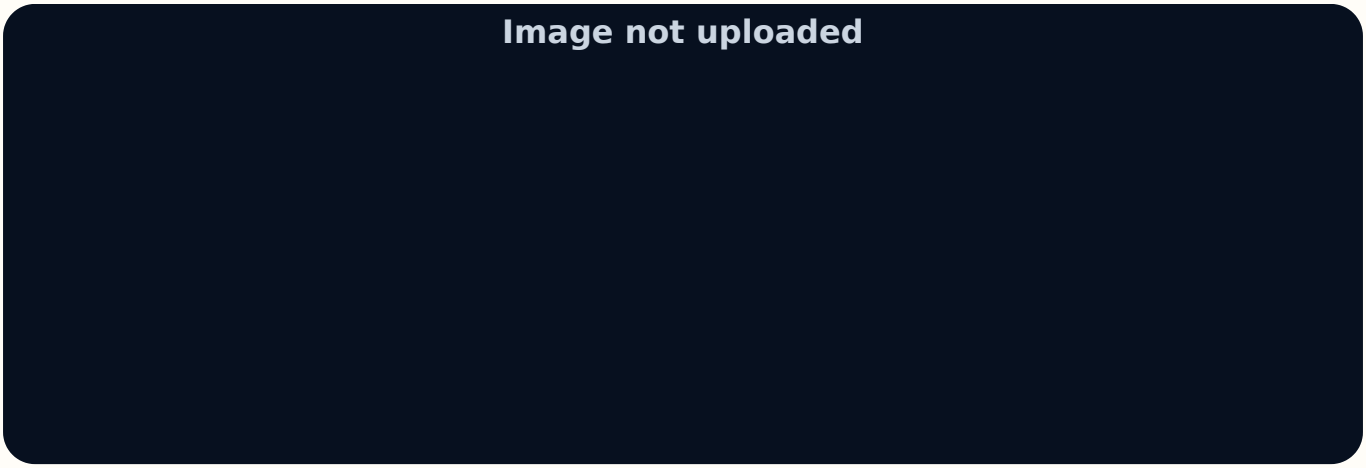

Every business works differently. We understand its people, priorities, and pressure before shaping a solution.

SCOPE

Define Before Building

Unclear scope creates delay, confusion, and extra cost. We define what matters now and what can wait.

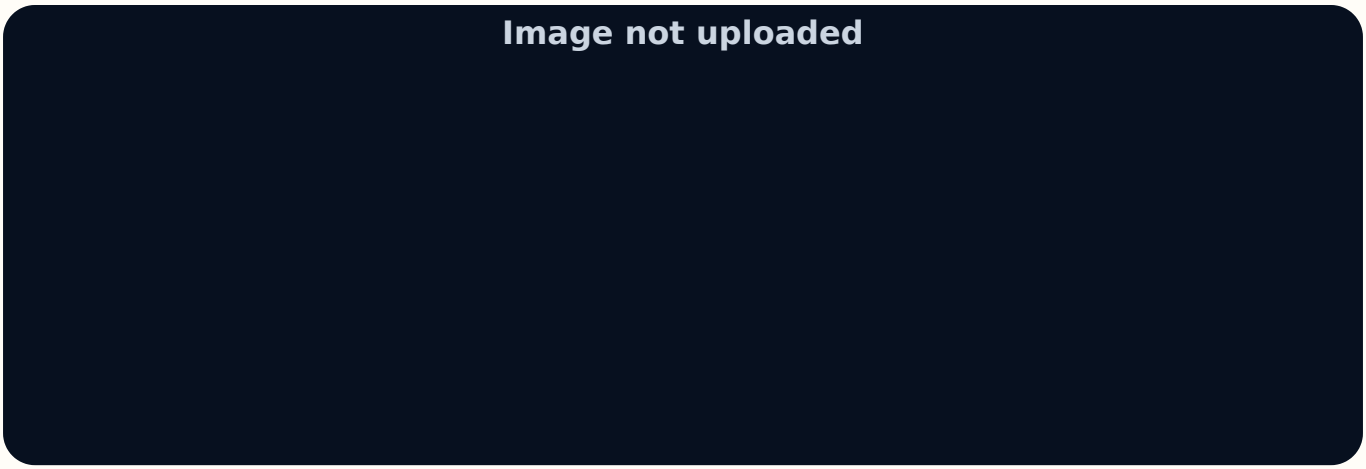

16

DECISION-MAKING

Make the Next Step Clear

A business does not always need every answer at once. Sometimes it only needs clarity about the next responsible step.

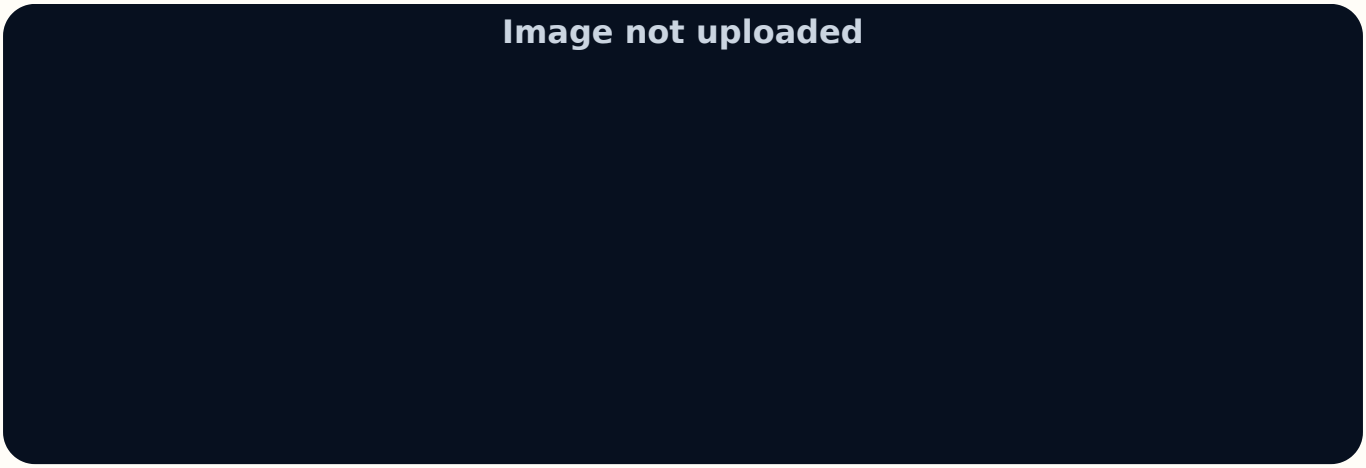

17

LONG-TERM THINKING

Build for Continued Use

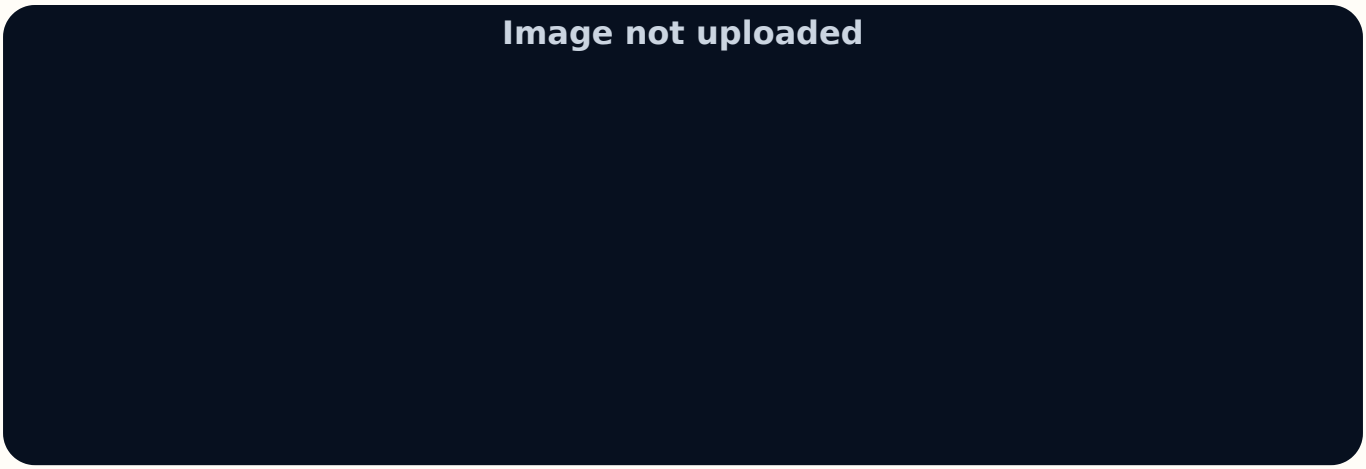

A solution should remain useful after the project ends. We consider ownership, training, maintenance, and future changes.

PARTNERSHIP

Work With, Not Around

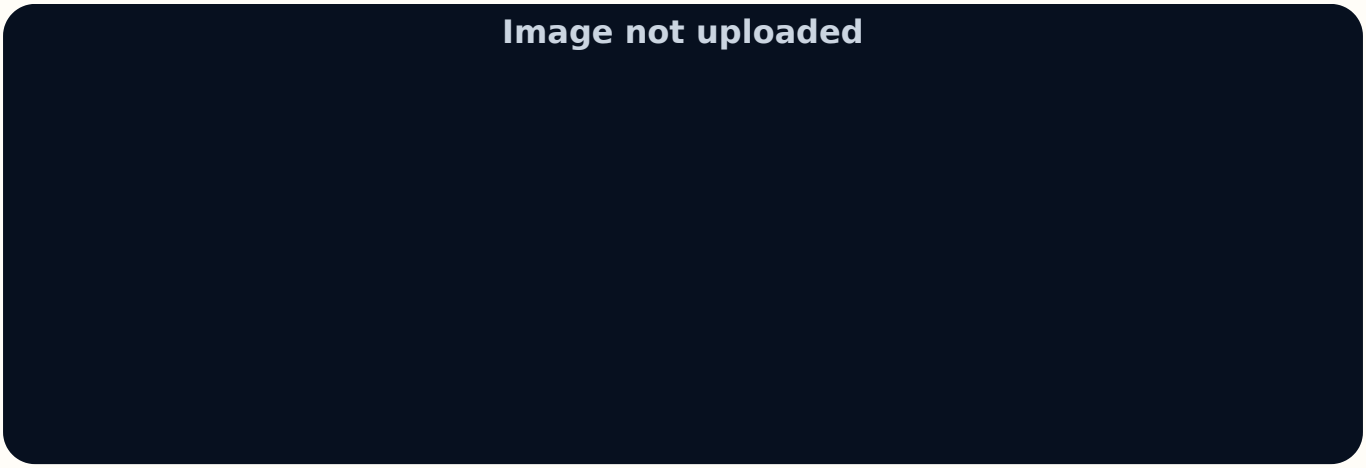

We work closely with the client’s people, not separately from them. Decisions are explained, and knowledge stays within the organization.

PROGRESS

Improve What Already Exists

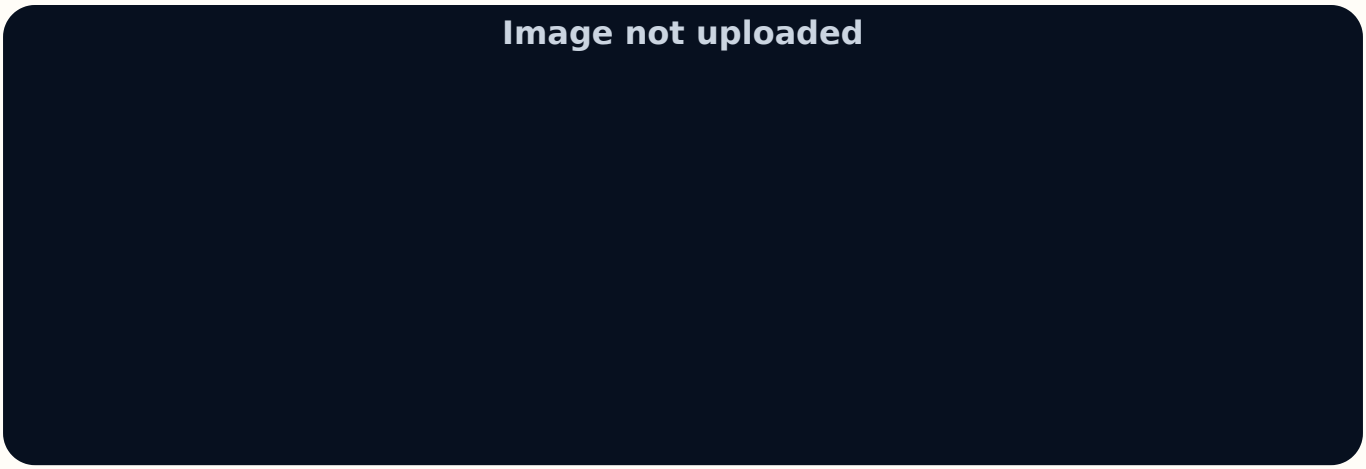

Not every business needs to start again. We keep what works and improve what causes difficulty.

MEASURING RESULTS

Useful Results Over Activity

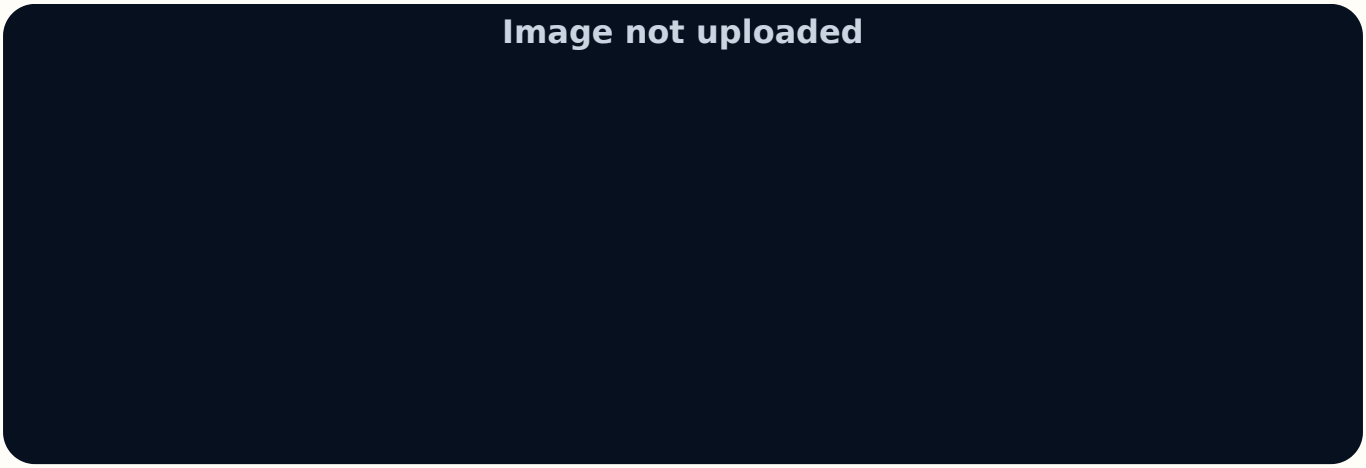

Meetings, documents, and features do not always mean progress. We look for clearer work, fewer mistakes, and better control.

OUR COMMITMENT

Stay Sincere

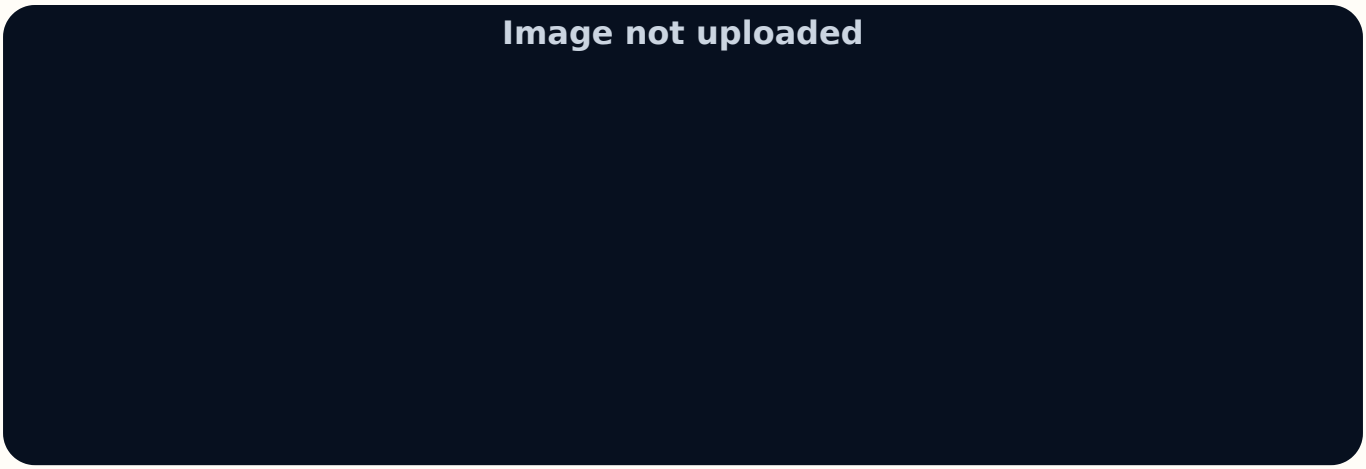

We approach every assignment with care, discipline, and honesty. When an answer is not clear, we study before we speak.

MY EXPERIENCE

Lessons From Real Work

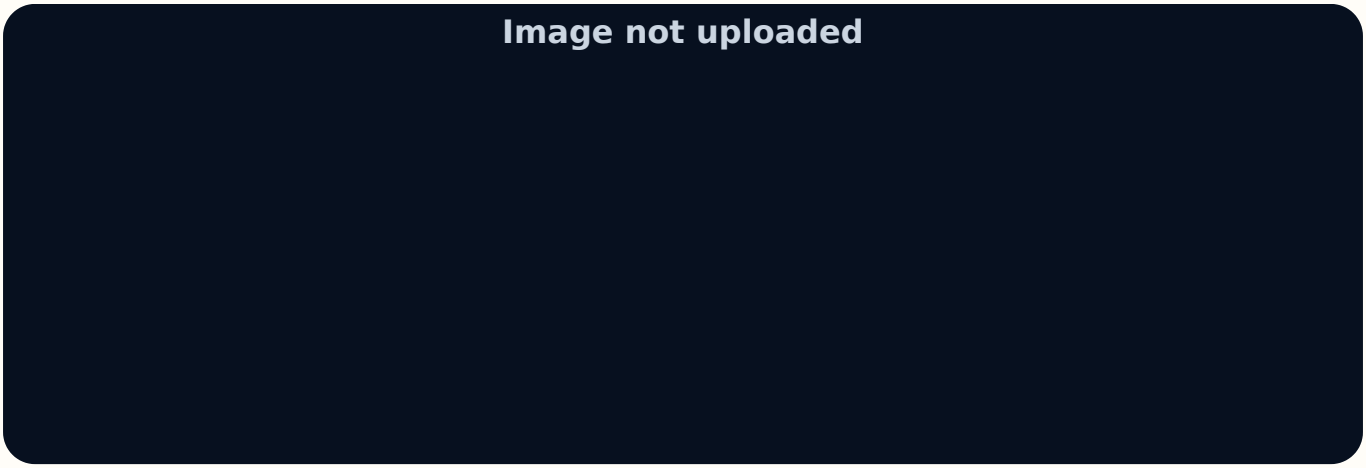

My thinking comes from years of working with projects, products, teams, and business operations. ITQAN brings planning and execution closer together.

LEADERSHIP

Responsibility Must Be Clear

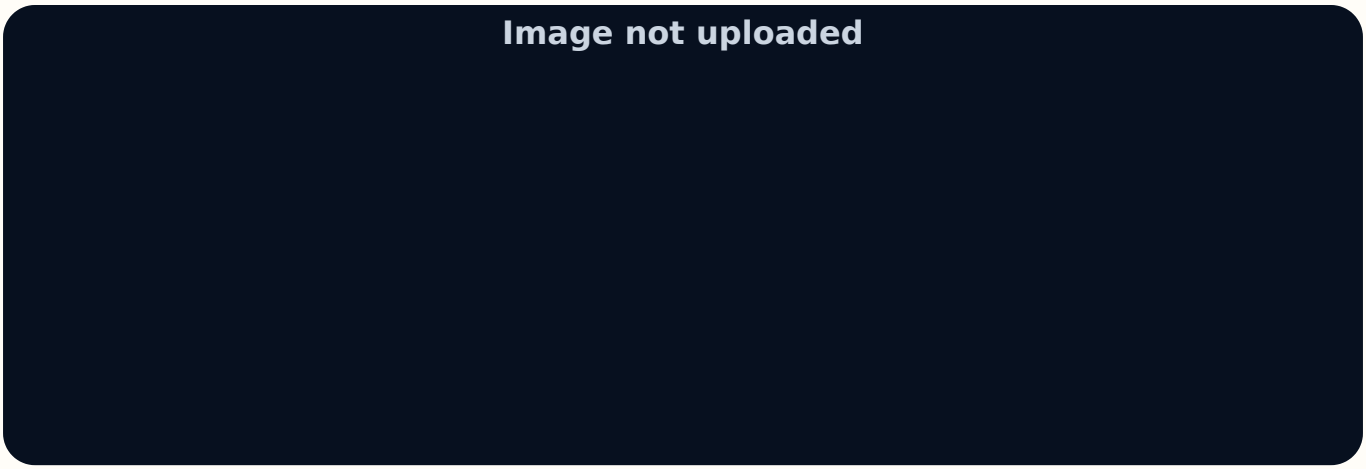

Projects suffer when no one truly owns the outcome. We help define responsibility and strengthen decision-making.

ABOUT GROWTH

Growth Needs Structure

As businesses grow, informal ways of working often create confusion. We introduce enough structure without making the business heavy.

OUR PURPOSE

Make Business Less Messy

ITQAN helps businesses understand their work and organize what matters. We support the journey from problem understanding to practical execution.
